

Workflow

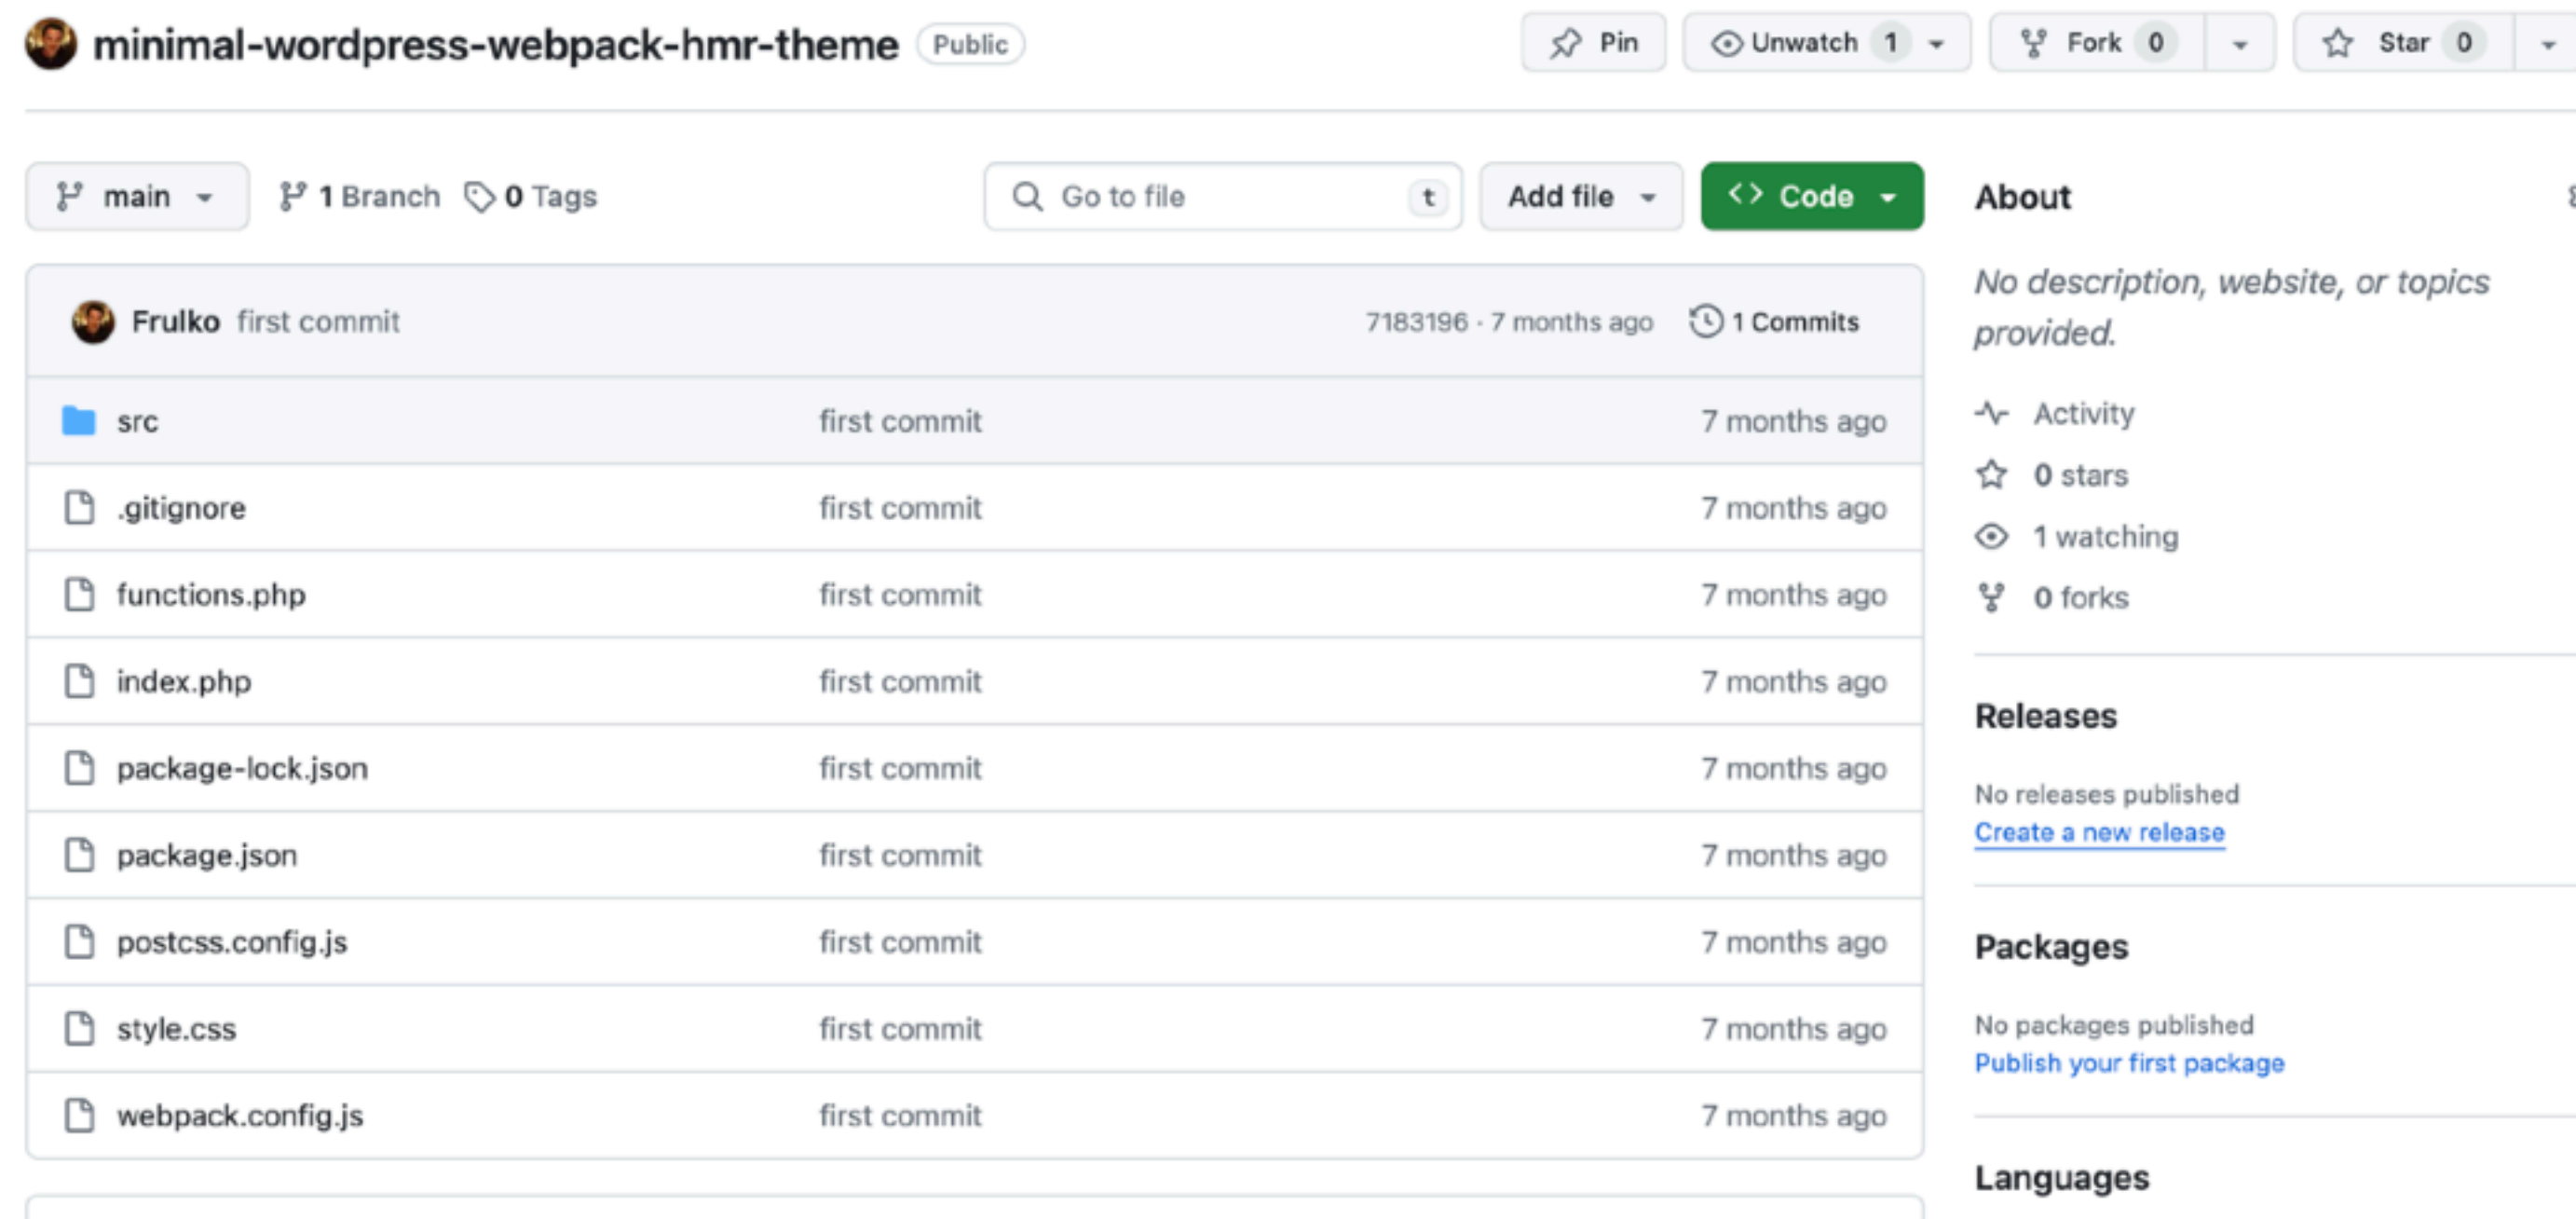

via webpack mais y'en a d'autres

- permet de prendre des fichiers "source" et de les optimiser pour le web
- permet de mettre à jour le style et le javascript à chaud (démon)
- permet de prendre en charge la conversion du scss, optimiser les images..
- besoin de node.js
- besoin de faire une configuration qui peut être pénible
- il existe des alternatives mais pas toujours adapté pour faire du WordPress mais plus pour du react, vue, etc.. -> vite.js

Workflow

via webpack mais y'en a d'autres

The screenshot shows a GitHub repository page for 'minimal-wordpress-webpack-hmr-theme'. The repository is public and has 1 branch (main) and 0 tags. It was created by 'Fulko' 7 months ago. The repository contains 1 commit. The file list shows the following files: src, .gitignore, functions.php, index.php, package-lock.json, package.json, postcss.config.js, style.css, and webpack.config.js. All files were first committed 7 months ago. The right sidebar shows the repository's activity, including 0 stars, 1 watching, and 0 forks. It also includes sections for Releases, Packages, and Languages.
